Projects

SQL Data Analysis — Zomato Bangalore Restaurant Intelligence (51K+ Records)

GitHub Repository

- Analyzed 51,717 restaurant records using MySQL to identify 67.7% poor quality segment — recommended platform improvements
- Discovered Sankey Road as #1 expansion opportunity using SQL location analysis — zero delivery despite premium pricing
- Built 23 business-driven SQL queries using window functions, subqueries and CASE WHEN on real Zomato dataset
- Identified fusion cuisine supply gap with 136K+ votes but only 13 restaurants — recommended urgent recruitment drive.

Amazon Sales Analysis Dashboard (Power BI)

GitHub Repository

- Built an interactive Power BI dashboard to analyze 302M+ e-commerce sales across platforms, cities, and product categories.
- Visualized key KPIs, monthly revenue trends, and platform-wise performance to support data-driven decisions.
- Conducted category and brand-level analysis to identify top-performing products and major sales contributors.
- Implemented data cleaning, data modeling, and DAX measures to ensure accurate and reliable reporting.
